

Flu Shots

Influenza immunization coverage is provided for one annual flu shot per person when billed by a participating BCBS doctor. Facility charges or charges for a concurrent office visit associated with the immunization are not covered.

Tetanus shots: Tetanus diphtheria (Td) booster vaccination will be provided for one Td booster vaccination every 10 years.

Pneumonia shots: Coverage will be provided for 1 dose of pneumococcal polysaccharide vaccination (PPV) for enrollees age 65 or older.

H1N1 shots: The federal government will cover the cost of the H1N1 flu vaccine for the 2009/2010 flu season; therefore, no benefits will be allowed for the vaccine.

No reimbursement is available for flu shots obtained at a non-BCBS provider such as Target, Walgreen's, Visiting Nurse Association, etc.
